Product Management Professional | Marketing Strategy & Media Production | Electrical Systems

WORK EXPERIENCE

Technical product and systems professional with 15+ years leading cross-functional initiatives across automation systems, media technology, aerospace marketing, utility infrastructure, and aerial platform development. Experienced in product implementation, systems integration, stakeholder coordination, technical operations, and customer-focused solution delivery. Proven track record supporting revenue growth, managing complex technical deployments, and translating operational requirements into scalable solutions across enterprise and high-performance environments.

AREAS OF EXPERTISE

Product Operations | Technical Product Management | Systems Integration | Cross-Functional Leadership | Stakeholder Management | Product Implementation | Automation Systems | Technical Documentation | Product Strategy | Process Optimization | Agile Collaboration | Go-to-Market Support | Marketing Strategy | KPI Alignment | Data Analysis & Reporting | Networking & Electrical Infrastructure | Audio/Visual Systems | RF & Wireless Systems | Vendor Management | Customer-Focused Solutions

KEY ACHIEVEMENTS

- Designed, prototyped, and manufactured a portable LED lighting product for film production environments
- Contributed to \$700,000+ in combined automation and high-fidelity systems sales
- Assisted product launch award winning marketing initiatives for the Gulfstream G650 aircraft program leading to an increase of sales by 110%
- Increased profit for educational organization by \$300,000+ through multi-channel marketing campaign strategy
- Managed development initiatives for drone stabilization, LiDAR, and autonomous deployment systems
- Led technical coordination across enterprise productions for Marvel Studios, Netflix, Disney, NBC, and Sony
- Managed system lifecycle operations for 170+ active building automation systems supporting residential AV, networking, and control infrastructure

WORK EXPERIENCE

Building Automation Systems, Product Consultant & Project Manager

June 2025– present

Evolution Home Theatre | Atlanta, GA

Responsible for end-to-end design, deployment, and lifecycle management of integrated home automation systems, including lighting, audio/video distribution, climate control, security systems, and high-fidelity entertainment environments using ADI & Control4.

- Manages a portfolio of 170+ active automated control systems, ensuring reliability, system performance, and continuous optimization through remote monitoring and maintenance.
- Coordinates cross-functional installation efforts across engineering, networking, and client-facing teams, aligning technical execution with customer requirements and project timelines
- Drives \$200K in automation system sales and \$500K in high-fidelity audio/video systems sales, contributing directly to revenue growth and solution adoption
- Supports product configuration and system customization using Control4 automation programming, tailoring solutions to client needs and use cases
- Implements and supports enterprise-grade networking and control infrastructure using Araknis, Ubiquiti, and Media over IP architectures
- Provides ongoing system lifecycle management and remote diagnostics using OvrC remote management platform, improving uptime and reducing on-site service requirements
- **Technical Certification & Platforms:** Control4 Programming & Automation (Certified, 2026), Araknis Systems, Ubiquiti Networking, Centralized Lighting Systems, Media over IP, OvrC Remote Management

IATSE Union Department Head, Production Sound Engineer

August 2011 –March 2025

Entertainment Partners | Atlanta, GA

Led end-to-end audio production operations for high-budget film and television productions, managing complex technical systems, cross-functional teams, and time-sensitive delivery environments across studio and on-location settings.

- Managed entire production **sound team**, coordinating daily execution, task prioritization, and quality assurance in fast-paced adverse and dangerous production environments
- Served as technical lead responsible for **logistics, coordination, and integration of sound systems across multiple production departments**, ensuring alignment between creative, technical, and operational stakeholders
- Oversaw configuration and operation of **wireless RF (UHF frequency coordination) systems**, ensuring system reliability, interference mitigation, and uninterrupted production workflows
- Designed and operated **custom mobile recording and playback systems** using professional-grade hardware and software platforms, optimizing for portability, scalability, and performance
- Managed **on-set and studio-based audio playback workflows**, including editing, synchronization, and system integration for production continuity
- Collaborated with production, post-production, and engineering teams to ensure seamless audio delivery across multi-phase production pipelines
- Supported high-profile productions for major studios and networks including **Marvel Studios, Disney, Sony, Universal, Netflix, Hulu, NBC, ABC, CBS, AMC, BET, TBS, and Tyler Perry Studios**, operating in high-stakes, enterprise-scale environments

IATSE Union Electrical Department Head, Lighting Designer

June 2008 – July 2011

Entertainment Partners | Savannah, GA

Led technical lighting operations, product design initiatives, and cross-functional production logistics for film and television environments, managing complex infrastructure, personnel coordination, and custom hardware solutions.

- Designed and manufactured the **EYE Light**, a portable battery-powered LED lighting system with adjustable daylight/tungsten color temperature settings, supporting on-location production flexibility and operational efficiency
- Managed teams of lighting technicians across multiple productions, overseeing scheduling, execution, troubleshooting, and quality control in fast-paced production environments
- Coordinated operational logistics including workforce planning, labor scheduling, payroll coordination, equipment rentals, transportation, permits, and security management to ensure seamless project execution
- Oversaw large-scale electrical and lighting infrastructure deployments, including **power distribution, rigging, dimming systems, DMX/Hog lighting control systems**, and conversion from industrial three-phase power to end-use production applications
- Collaborated with production leadership and technical stakeholders to align lighting system implementation with creative requirements, operational constraints, and production timelines
- Supported simultaneous technical and operational workflows across dynamic, deadline-driven projects requiring rapid problem-solving and systems coordination in hostile environments

Marketing Consultant

June 2008 – July 2011

Gulfstream Aerospace | Savannah, GA

Supported cross-functional marketing and production initiatives for the launch and promotion of the Gulfstream G650, contributing to campaign development, technical production strategy, and multimedia content execution for a flagship aerospace product.

- Contributed to development and execution of integrated video marketing campaigns supporting the launch of the **Gulfstream G650**, aligning technical production deliverables with brand and product messaging objectives
- Collaborated with creative, production, and technical stakeholders to deliver high-quality multimedia assets for enterprise marketing initiatives and executive-facing communications
- Designed and implemented post-production audio solutions, including signature sound design, sound effects editing, and acoustic optimization for challenging recording environments
- Served as Production Sound Engineer and technical lead for wireless frequency coordination with FAA and airport tower operations, ensuring compliance, operational continuity, and production reliability in regulated environments
- Managed technical troubleshooting and quality assurance for audio and video production systems, ensuring consistent delivery standards across complex production environments

Marketing Consultant

2009 – 2011

Savannah Film Company | Savannah, GA

Led and supported multimedia marketing campaigns, technical production initiatives, and branded content development for commercial clients, educational organizations, and entertainment productions.

- Produced and managed integrated marketing campaigns across video, digital media, photography, and branded content channels for regional businesses and organizations

- Developed and executed a **7-campaign marketing initiative** for Savannah Country Day School that contributed to a **25% increase in student enrollment (~240 students)** through targeted storytelling, multimedia production, and audience-focused messaging
Created digital marketing assets and promotional campaigns for local businesses, including script development, video production, photography, and electronic press kits for **E Market South**
- Collaborated with aerial photography teams to develop advertising and promotional media campaigns featuring commercial footage for downtown business initiatives
- Produced and supported a multi-channel marketing campaign for **Bull and Bones Brewery**, contributing to sustained brand visibility during the company's first year of operation
- Designed and delivered campaign content published in the **Key to Savannah** marketing publication (2009–2010)
- Collaborated with production partners on the **2014 Philadelphia Cream Cheese digital marketing campaign**, supporting branded media production and campaign execution
- Served as Specialty Gaffer and DC lighting designer for special entertainment productions, including a Foo Fighters music video project, managing high-voltage power logistics, LED fixture development, and technical production systems

Systems Consultant

August 2022 – Present

Linebird UAV Control Systems | Richmond, VA

Provided technical systems consulting and strategic marketing advisory support for utility infrastructure technology solutions focused on transmission-level powerline assessment and monitoring.

- Supported deployment and operational implementation of the **Ohm Stick**, a high-voltage transmission line assessment system designed to analyze conductor temperature, bonding integrity, oxidation levels, and infrastructure aging
- Managed cross-functional development efforts for the **Bird Box automated charging and retooling launch platform**, supporting operational efficiency and autonomous deployment workflows for aerial systems
- Collaborated with technical and operational stakeholders on aerial deployment strategies and field implementation workflows for utility infrastructure monitoring systems
- Contributed to product positioning and vendor engagement initiatives by advising on partnership development, market strategy, and customer-facing communications
- Evaluated effectiveness of marketing and vendor relation strategies, helping align technical product capabilities with customer needs and industry use cases

Project Manager – Payload Stabilization System

2019 – 2022

RVAreial | Richmond, VA

Managed technical development initiatives for aerial systems platforms, supporting stabilization technology, autonomous operational workflows, and advanced scanning solutions for drone-based applications.

- Led payload stabilization projects for aerial tool attachment systems, coordinating development and testing of high-speed gyro stabilization technologies and 2.4 GHz radio serial communication systems between ground operators and airborne platforms
- Collaborated with engineering and technical teams on development of aerial LiDAR scanning capabilities and 3D rendering workflows for mapping and visualization applications
- Supported product development lifecycle activities including technical troubleshooting, systems integration, field testing, and operational optimization
- Coordinated technical requirements and implementation priorities across hardware, communications, and deployment systems in fast-paced R&D environments
- Assisted in translating complex technical functionality into operational use cases and scalable deployment strategies for aerial technology solutions

EDUCATION, CERTIFICATIONS, & AWARDS

B.A. of Arts in Film Digital Media
Electrical Engineering Coursework

Savannah College of Art and Design
Virginia Polytechnic Institute and State University

ADDY Awards
The Motion Picture Academy Awards
AMPS Awards
SXSW Film Festival
Motion Picture Sound Editors
Telly Award

Commercial, Gulfstream Aerospace
Team Nominated Best Sound Mix
Team Awarded Best Sound Mix
Audience Choice Award
Nominated Golden Reel
ESPN Documentary Award

Tech Ops, G650 Interior, The Call, etc.
Baby Driver
