THOMAS J. DOOLITTLE

AV Production Engineer | Live Audio, RF and Production Sound | Atlanta, GA
540.230.7829 | doolittle.thomas@gmail.com

PROFESSIONAL SUMMARY

AV production engineer and IATSE sound department head with 15+ years of experience running live production audio, RF frequency coordination, multi-track recording, and lighting for major film, television, and broadcast productions. Currently designs and programs integrated AV and control systems in Atlanta. Leads crews through long, high-pressure show days, troubleshoots signal flow under show conditions, and explains technical tradeoffs to clients in plain English. Hands-on fabricator and safety-first crew lead with extensive on-location travel experience.

CORE COMPETENCIES

AV Production • Live Audio Mixing • Digital Audio Consoles • Dante • RF Coordination • Signal Flow and Signal Routing • Multi-Track Recording • Troubleshooting Under Show Conditions • Crew Leadership • Client Communication • Pre-Production Planning • Gear Prep and Logistics • Stage Lighting • Live Event Networking • AV Control Systems • Video Production and Editing • Fabrication • Safety

TECHNICAL SKILLS

Audio: Yamaha 01V96 digital console, Dante audio networking, Avid Pro Tools, Avid Pro Tools studio consoles, Sound Devices production recording systems, Zaxcom, Aaton Cantar X3, Shure Systems, Boom Recorder, live dialogue and voice mixing, music playback

RF and Wireless: UHF frequency coordination, Lectrosonics wireless systems and frequency coordination software, Comtek systems, 2.4 GHz serial radio control

Video and Lighting: Video production and editing, Phantom high-speed camera, DMX lighting control, Hog lighting consoles, stage rigging, three-phase power distribution, LED fixture design

Control and Networking: Control4 (certified), Araknis and Ubiquiti networking (certified), Media over IP (certified), OvrC remote monitoring, centralized lighting control

Fabrication: Product design and manufacturing (EYE Light LED panel), custom mobile sound carts, custom LED fixtures

PROFESSIONAL EXPERIENCE

AV Systems Designer and Programmer
Evolution Home Theatre LLC

- Design integrated AV and control systems (lighting, audio, video, climate, security, and high-fidelity sound) on Control4, turning client requirements into system designs, equipment specifications, and signal routing.
- Coordinated installation of 170 active control systems and maintain them; monitor, troubleshoot, and fix issues remotely with OvrC.
- Build and support client networks on Araknis and Ubiquiti, including Media over IP video distribution.
- Generated approximately $300K in automation sales and $600K in high-fidelity system sales (McIntosh, Wilson Audio, Sonus Faber, dCS, Linn, Audio Research).
- Collaborate with vendors to design custom products for client-specific needs.

Production Sound Engineer and Sound Department Head (IATSE)
Entertainment Partners Inc. and Cast and Crew LLC

- Led the on-set sound department for feature film and television productions, directing boom operators and sound utility technicians through long, non-standard shoot days.
- Owned UHF RF frequency coordination for multi-channel wireless systems (Lectrosonics, Comtek), clearing frequencies and resolving interference live during production.
- Mixed and recorded multi-track production dialogue using Sound Devices, Zaxcom, and Aaton Cantar X3 recorders and Boom Recorder software.

- Designed and built custom mobile sound carts, owning signal flow, routing, power, and wireless integration from microphone to recorder.
- Operated and edited Pro Tools music playback on location and in recording studios, including Stranger Things (Seasons 2–3).
- Coordinated sound logistics, gear prep, and timelines with camera, electric, and production departments.
- Clients: Marvel Studios, Disney, Sony, Universal, Netflix, Hulu, Apple, CBS, NBC, ABC, AMC, BET, TBS, Food Network, ESPN SportsCenter, Adult Swim, Happy Madison, Tyler Perry Studios, Skydance.

Lighting Designer and Electrical Department Head (IATSE)
Entertainment Partners Inc. and Cast and Crew LLC

- Managed teams of lighting technicians on location, handling scheduling, crew hours, payroll coordination, equipment rentals, vehicles, security, and permits.
- Rigged large-scale stages, programmed DMX lighting on Hog consoles, and designed dimming and power distribution from three-phase industrial service down to single-phase Edison circuits.
- Designed, manufactured, and operated the EYE Light, a portable battery-powered LED light panel with adjustable daylight/tungsten color temperature.

Video and Sound Production Consultant
Gulfstream Aerospace

- Produced video marketing campaigns for the Gulfstream G650 launch, including sound design, sound effects editing, and acoustic treatment of difficult recording spaces.
- Coordinated wireless frequencies with the FAA and local airport tower to capture clean interview audio on an active airfield.
- Served as technical advisor for high-speed lighting with the Phantom camera system.

Production and Lighting Consultant
Savannah Film Company

- Worked as gaffer and DC lighting designer on a Foo Fighters music video special; managed high-voltage power distribution and built custom LED fixtures for costumes.
- Produced video campaigns for Savannah Country Day School that helped increase enrollment by 25% (about 240 students).
- Created scripts, video, photography, and electronic press kits for local business marketing campaigns.

ADDITIONAL EXPERIENCE

Systems Consultant
Linebird UAE Control Systems

- Deploy aerial high-voltage transmission line assessment hardware (Ohm Stick); advise on vendor relations and marketing strategy.

Project Manager, Payload Stabilization
RVAerial

- Led development of gyro-stabilized drone tool payloads using 2.4 GHz serial radio control, plus a recharging and retooling launch pad; supported aerial LiDAR scanning and 3D rendering.

EDUCATION

Bachelor of Arts, Film and Digital Media (Sound Design)
Savannah College of Art and Design

Electrical Engineering Coursework
Virginia Polytechnic Institute and State University

CERTIFICATIONS

Control4 Programming and Automation • Araknis Networks • Ubiquiti Networking • Centralized Lighting Control • Media over IP

AWARDS

- Baby Driver, Sony, Sound Team: Academy Award nominee and AMPS Award winner, Best Sound Mixing (2017–2018)
- Telly Award, Documentary: ESPN, The Cuban Comet (2021)
- SXSW Film Festival Audience Choice Award: The Short Game (2013)
- Motion Picture Sound Editors Golden Reel: The Secret Number (2012)
- Savannah Film Festival Best Sound: (V.) To Augment (2010)
- ADDY Awards (4): Gulfstream Aerospace commercials (2009–2010)

SELECTED PRODUCTION CREDITS - Internet Movie Data Base for full list

Film: Captain America: Civil War & A New Dawn, Spider-Man: Far From Home, Baby Driver, Jungle Cruise, The Tomorrow War, Godzilla: King of the Monsters, Fast and Furious 7 & 8, The Conjuring 3, Chaos Walking, Prisoners

Television: Stranger Things, WandaVision, The Walking Dead, Will Trent, Candy, The Right Stuff, Swagger, MacGyver, The Originals, Being Mary Jane
